

LOGIC TESTER AND SIMULATOR JIG

Product Overview

Logic tester board with 4 analog outputs

Logic tester board with 16 digital outputs

Features & Benefits

- 4 analog output channels (0-3.3V or 0-5V or 0-10V-selectable)
- 16 LED status indicators for digital logic
- Input voltage - 15-24V maximum
- Nominal voltage – 15V DC
- DC signal output

Technical Specifications

Applications

Logical testing and simulation

LED testing

Voltage measurement

Automatic test equipment

Physical Dimensions

Overall dimension – 127mm x 57.15mm

Input connector - DC barrel jack connector

Weight – 117g

Hole details – M3 – Hole pitch – 58.42mm x 33.02mm
